Hitpro Max ERP - Best Choice, Why?

- **HITPRO MAX is Customer Centric!** HITPRO MAX can be customized as per the specific requirements of the customer. A base ERP system to support your vertical applications. Make your own fully customizable ERP system. An ERP system for geographically-dispersed companies.
- **HITPRO MAX is Multi Capable!** HITPRO MAX is a multi capable system with Multi-Company, Multi-Division, Multi-Department, Multi-Tier, Multi-Warehouse, Multi-Currency and Multi-Language support.
- **HITPRO MAX is a Global Product!** HITPRO MAX is a global product with GAAP, Globally Accepted Accounting Principles, IAS, International Accounting Standards & IFRS, International Financial Reporting Standards compliance features.
- **HITPRO MAX is Scalable and Adaptable!** HITPRO MAX can run the entire application on one server or run each layer on its own server or split the application across multiple servers and a VB Dot Net based Desktop Shell Interface for use over LAN and WAN or VPN links for desktop shell clients, and a ASP Dot Net Interface that can be used world-wide over the Internet.
- **Increase Employee & Sales Productivity!** HITPRO MAX allows all of your employees to enter and share company data concurrently in real-time across town or across the world! Enter orders and check inventory from the field using a web browser or a Smart Phone!
- **Make Better Management Decisions Faster!** HITPRO MAX operates in real-time, so you always have the fastest access to the latest company data! Quickly spot trends and always have the latest information to help you make the best decisions! Produce real-time financial statements!
- **The Last Accounting & ERP System Ever Need To Buy!** HITPRO MAX will scale with your organization by simply adding inexpensive servers to the configuration, means your investment is protected. There are no per server or per processor licensing or pricing, and nothing more to buy.
- **Easy to Administer, Widely-Used Platform!** HITPRO MAX runs on Microsoft Windows 2008 or greater servers, which are easy and straightforward to administer and maintain, easy to perform and validate system backups, and allow you to take advantage of Microsoft's built-in replication, scalability, clustering, and multi-processor features at the most cost-effective price available!
- **Customer-Centric & Automated!** HITPRO MAX comes with modules that help you connect with the people most important to your company. An Integrated Web-Based CRM System helps you keep in contact with your potential customers while an Integrated Web-Based Shopping Cart allows you to convert your leads to customers and an Integrated Web Based Support System helps you keep your customers!
- **Cost Effective Solution!** There are no third party components or controls used in the software, so there is nothing additional to buy. Compared to any other ERP products in the market, HITPRO MAX is the very cost effective solution as per the company's budget.

Hitpro Max ERP - Unique Highlights

- Latest **Microsoft Dot Net Technology** allows operating with two user interfaces (a Desktop Interface & a Web Interface) against the same set of Web Services and Accounting Engine.
- The Multi-Tier Design allows for **Unlimited Scalability** where you can run the entire application on one server or run each layer on its own server or split the application across multiple servers.
- There are **No Third Party Components** or controls used in the software, so there is nothing additional to buy.
- Data is protected and the **Security Safeguards** in the system allows only the enterprise client to access the application.
- The system has a complete **Audit Trail** which keeps tracks of every change to every field and keeps **History** of all transactions.
- Transactions within the system are treated as **Legal Documents** and therefore cannot be edited or deleted once posted to General Ledger.
- The system supports the separation of **Business Functions**, means, that the employees entering bills can't also print cheques, and the people ordering goods can't also receive goods, etc.,
- The system supports a **Purchase Approval Process & Payments Approval Process**, based on the defined authorization workflow.
- The system works with SQL Server Express (the **FREE Database Version** from Microsoft) which connects natively with thousands of third party Data Warehousing Tools & Systems!
- New **Language Translation Engine**, supports any number of languages, translations done on the fly and user has the ability to add their own language or edit the provided translations.
- Greatly reduced number of post backs to the client and eliminate a lot of the un-necessary form refreshes. The Client call back functions support **Prevents Page Flicker**.
- Simple **User Interfaces** that are intuitive and easy to navigate. Supports various models of **VAT Taxation** that allows the software to be used globally.
- The system supports complete **Customization** in each level in the Accounting and Reporting Engine and changes and enhancements done quickly as per the requirements.
- The system has a **Memorization** feature, where the important and frequent transaction can be saved and new documents can be created quickly based on the memorized transactions.
- Advanced **Web Based Reports** generation engine create reports for the screen, printer or output them directly into Microsoft Excel and Graph for further analysis and many more output options including Emails.
